Window Cover Design Process

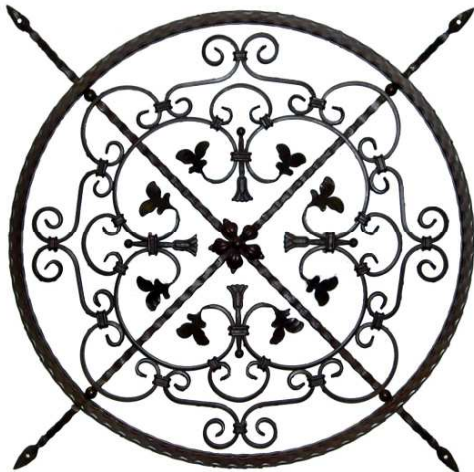

Center Piece:

Design Layout:

Window Cover:

Designing a Custom Window Cover is a simple process if broken down into these easy steps:

1. Determine the size of your opening. Measure the Interior as well as Exterior of the opening.
2. Decide on the frame size and type. Metal Amore' stocks a variety of decorative bar types to frame your project.
3. Choose a location in the showroom to design your Window Cover. Layout a frame using the dimensions of your opening.
4. Choose the bar stock. Twisted, Hammered, Tree Bark, square or round – different bar stock is used to create different looks.
5. Choose a centerpiece.
6. Fill in the frame until you have the desired design.
7. Take a picture of your design for the fabricator to work from.
8. Contact a fabricator to get your custom designed window cover fabricated and installed.
