Window Grate Design Process

Center Piece:

Design Layout:

Window Cover:

Designing a Custom Window Grate is a simple process if broken down into these easy steps:

1. Determine the size of your opening. Measure the Interior as well as Exterior of the opening. Determine if you want the Window Grate on the exterior or interior of the frame.
2. Decide on the frame size and type. Metal Amore' stocks a variety of decorative bar types to frame your project.
3. Choose a location in the showroom to design your Window Grate. Layout a frame using the dimensions of your opening.
4. Choose the bar stock. Twisted, Hammered, Tree Bark, square or round – different bar stock is used to create different looks.
5. Choose a centerpiece.
6. Fill in the frame until you have the desired design.
7. Take a picture of your design for the fabricator to work from.
8. Contact a fabricator to get your custom designed window grate fabricated and installed.
