Wine Cellar Gate

This Wine Cellar / Entry Gate is one of the most popular home owner design selections in our showroom. The scrolls used for this design form a different gate with each application, making each gate unique.

Metal Amore' designed a custom gate with these pieces using a smaller frame. Fabricated by Pete's Welding of San Marcos with a special finish applied by Michael Spencer of Vista, our gate is 36" x 64".

Many home owners come into the showroom, and are instantly overwhelmed with the selection choices. This simple design process is an excellent beginning to your project:

1. Determine the size of your opening. Measure the height and width for your gate.
2. Decide on the frame. This gate is framed with Hammered Tube which is always in stock at Metal Amore'.
3. Choose a location in the showroom to design your gate. Layout a frame of your size using material the same width as your frame selection.
4. Fill in the frame until you have the desired design.
5. Take a picture of your design for the fabricator to work from.
6. Contact a fabricator to get your custom designed gate fabricated and installed.
